CARDEV CB200 COOLANT BOWSER

The Cardev CB-200 Coolant Bowser is designed to transport up to 200 ltrs of freshly mixed coolant in a clean and secure unit, thereby avoiding any contamination or spillage of the coolant, from the Cardev CMS-300/1000 range of coolant mixing stations to any of the machine sumps in the factory.

Upon arrival at the machine sump the CB200 is connected to the factory air-supply and when the delivery gun trigger is operated will automatically dispense the coolant into the sump.
