

## PANOLIN over water

The London Eye is an easily recognisable London landmark and has become a byword for reliability. As an attraction it is as popular now as it was at the start of the millennium.

Less well known is the fact the London Eye is powered by hydraulics, and that PANOLIN HLP SYNTH is the hydraulic fluid that was specified for this very high profile and prestigious application.

The oil is still the original fill and has not been changed. For hydraulic designers Hydraudyne of Holland this was a major consideration at the design stage, as was a reputation for outstanding performance and full approval from Bosch Rexroth.

«We are totally delighted with the oil. To date, the London Eye has run for over 60'000 hours of operation with routine maintenance only. PANOLIN are always on hand if we need to discuss any issues, and regular oil sampling confirms that all is well», commented Kevin Dyer – Maintenance Manager.
